The wonder is that teach them the necessity of diversifying their crops. Many sections of Fairfield have the right kind of soil for tobacco, and there is no reason why its culture should not be made a

THE organization of the Home Saving Association adds one more to the financial institutions of our town. The plan upon which it proposes to by monthly installments, has been tried here and elsewhere, and experience has shown that no better plan can one's earnings. These organizations should be encouraged, for they help not only the stockholders but are very valuable aids to our citizens generally.

It is a little significant that at the Lexington meeting held for the purpese of giving the candidates for Gevernor an opportunity to address the people of Lexington County that only about one hundred were present. It is true that this is a very busy season of the year with the farmers, but even that does not account fully for the very small attendance in one of the strongest reform counties in the State. Perhaps, the people are getting tired of hearing the constant wrangle among the politicians.

Ir there has been any jobbing done by United States Senators on account of their knowledge of the tariff bill, we think that it ought to be expesed. Simply because a man is a United States Senator does not make him incapable of such conduct. The United States Senators have robbed the country of what it had a right to expect in has been deriving some benefit there-the way of legislation. The Senate from already and the blooming of his has done a great many things that the people do not like. The conduct of some of them is not as pure as it might be. It might be that there is some- his garden would amount to nil, but thing in the jobbing business.

Ir the News and Courier is correct in what it says about so many white citizens in Charleston being practically disfranchised, something should certainly be done about it when the next and surrounding community. General Assembly convenes. This reyeals a very serious condition of affairs, and we shall not believe that a Legislature composed of native Carolinians will consent to disfranchise their ewn blood in this way. There are 35,000 conservatives in this Statea very formidable number-and there is something in the Anglo-Saxon blood that will not tolerate a deprivation of personal rights and privileges.

GOVERNOR TILLMAN has no bitter words for Judge Simonton this time. We are like Governor Tillman. ### RIDGEWAY SCRAPINGS.

RIDGEWAY, S. C., March 16 .- Farmers are having most excellent weather for turning the soil, and from what can be ascertained, they are certainly taking advantage of the golden opportunity; however, I suppose the low price of the fleecy staple is rather discouraging to the energetic fellows. Plant less cotton, gentlemen, more corn, abandon the lien law and become an independent people again.

Allow me to compliment Dr. Mood on his extraordinary fine garden. He English peas are very encouraging to him. About two weeks ago when the snew began to clothe the ground in her virgin robes, the Doctor thought immediately afterwards he began to seek the treasures of the hidden snow and soon ascertained the fact that his garden was not injured in the least. Doctor is a clever little fellow, full of energy and zeal, highly esteemed by his fellow-practitioners and has won the respect and confidence of the town

Mr. I. C. Thomas has about completed his new residence, which is a complete piece of mechanism, and will add considerably to the looks of Ridgeway.

The singing of the birds and budding of the trees tell us that Spring is at hand; and a very dull one it is too; if were not for the ringing of the school bells and sound of the railroad whistles, we would feel as if we were in the prairies of the Wild West. However, we can't grieve because the winds stretch forth their innocent wings and angrily beat the lofty pine. Dr. Provence has recently located in

Longtown for the purpose of practicing his profession. The Doctor is certainly a successful practitioner and has left no stone unturned in the study of
